TO WHOM SO EVER IT MAY CONCERN

This Is to certify that M/S Shivani Scientific Industries Pvt. Ltd Mumbai, India had executed our supply order in 2017 for various IVF and ICSI equipments. They have successfully installed them in our hospital in time which is working satisfactorily. They had been regular in service and backup support since then.

We are extremely satisfied with the quality of the equipment, their after sales service and also performance of the other installed equipments.

We are particularly happy for the hands on embryology training provided by EART in collaboration with Shivani Scientific. The whole scientific team had been enthusiastic and had been providing us back up embryology services too.

We wish them all the very best.
